Yellowstone Bighorn Research Association, established in 1936, is a nationally recognized and award-winning non-profit field research association located in Red Lodge Montana. Dedicated to boots-on-the-ground experimental education, YBRA has partnered with universities, research institutions, corporations, and private donors to lead multiple generations in earth and life science field studies. An expansive YBRA campus and rustic accommodations create an ideal setting for hands-on learning. www.ybra.org
